**Use a Google ID Number for Images and More!**

This is a two step process, but can pay off big if you have a Gmail address on a target.

Use this site (<https://tools.epieos.com/google-account.php>) to locate the Google ID on a target.

Once you have that number, here are some uses:

Locate Archived Images - <https://get.google.com/albumarchive/{userID}>

Locate Map/Review Contributions - <https://www.google.com/maps/contrib/{userID}>
